Summary

Aspiring software engineer focused on building scalable, secure backend systems with Java and Spring Boot. Comfortable designing REST APIs, modelling relational data and keeping services correct under concurrent load.

Education

B.Tech, Computer Science & Engineering — Arya College of Engineering, RTU Jaipur (Aug 2023 – Jul 2027). CGPA 9.02

Technical Skills

Core Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, JDBC

Languages: Java, Python, C++, SQL

Databases: PostgreSQL, MySQL, MongoDB, Redis

Tooling: GitHub, Docker, Postman, Swagger, IntelliJ IDEA, Eclipse, Maven

Exploring: AWS, Apache Kafka, JavaScript

Projects & Experience

Hospital Management System — 2026 – Present

Spring Boot backend managing Patients, Doctors and Appointments with a DTO-based architecture and relational database integration. Scheduling logic prevents conflicting bookings so a doctor is never double-assigned. Stack: Java, Spring Boot, PostgreSQL, Docker, Postman.

Email Automation Platform — Jan – Jul 2026

Spring Boot backend automating lead generation and outreach: discovers similar companies from seed inputs, extracts contact information and automates personalized email communication at scale. Stack: Java, Spring Boot, PostgreSQL, Docker.

TaskFlow API — 2026

RESTful task and project management service with JWT authentication, rate limiting, real-time updates and Hibernate-optimized queries. Stack: Spring Boot, PostgreSQL, Swagger, JWT.

GSSoC 2026 Contributions — 2026

Backend contributions to three open-source Java projects: API performance, new endpoints and test coverage.

Java Backend Internship — School Management System — Summer 2025

Built a School Management System in Java with database integration for students, teachers and academic records; implemented CRUD operations and structured data management.

Backend Internship — Currency Converter — Summer 2025

Java Swing desktop app pulling real-time exchange rates from external currency APIs. Stack: Java, JDBC, REST, MySQL.

SEO Intern — Single Tap — Sep – Nov 2024

Off-page SEO for client websites: link building and optimization to improve search visibility and domain authority.

Snake Game — 2024

Java Swing game with real-time controls, collision detection, score tracking and game-over handling.

Hangman Game — Python Internship — Summer 2023

Python game with random word selection, input validation and attempt tracking.

Achievements

GitHub Pull Shark badge • 16 public repositories • 200+ LeetCode problems solved (3 badges)

Certifications

Java • C • PostgreSQL • MongoDB • Forage Software Engineering Job Simulation • Generative AI (LinkedIn Learning)
